

IN THE CLAIMS

Please cancel Claim 6.

---

1. (currently amended) An outer door panel for an appliance door assembly, said outer door panel having a longitudinal axis and comprising:

a frame comprising opposite lateral sides;

an outer surface extending from said frame and bowed between said lateral sides;

and

a recessed control mounting surface extending inwardly from said outer surface between said lateral sides, said recessed control mounting surface disposed at an angle with respect to said longitudinal axis.

could be 0° or 90° at 45°

2. (original) An outer door panel in accordance with Claim 1 wherein said outer surface extends between said control mounting surface and a top edge of said frame.

3. (original) An outer door panel in accordance with Claim 1 wherein said appliance is a dishwasher, said frame comprises a control panel cutout, said control mounting surface comprising an escutcheon received within said cutout.

4. (original) An outer door panel in accordance with Claim 3 wherein said outer surface is fabricated from metal.

5. (original) An outer door panel in accordance with Claim 3 wherein said escutcheon is fabricated from plastic.

6. (canceled)

7. (original) An outer door panel in accordance with Claim 1 wherein said panel is unitary.

8. (previously presented) An outer door panel for a dishwasher, said outer door panel comprising:

a frame comprising a longitudinal axis,

an outer surface covering said frame; and

a control panel mounting surface within said frame and surrounded by said frame outer surface, said control panel mounting surface inclined with respect to said longitudinal axis, such that said control panel mounting surface is mostly shielded by said outer surface.

9. (original) An outer door panel in accordance with Claim 8 wherein said outer surface is bowed.

10. (original) An outer door panel in accordance with Claim 8 wherein said outer surface surrounds said control panel mounting surface.

11. (original) An outer door panel in accordance with Claim 10 wherein said control panel mounting surface comprises an escutcheon.

12. (original) An outer door panel in accordance with Claim 11 wherein said escutcheon is fabricated from plastic.

13. (original) An outer door panel in accordance with Claim 12 wherein said outer surface is fabricated from metal.

14. (currently amended) A dishwasher door assembly comprising:

an outer door panel having a longitudinal axis and comprising opposite lateral sides and a top edge, an outer surface extending between said lateral sides and said top edge, said outer surface surrounding a recessed control surface disposed beneath said top edge of said outer panel, such that said recessed control surface is mostly shielded by said top edge, said recessed control surface disposed at an angle with respect to said longitudinal axis; and

an inner door panel attached to said outer door panel.

15. (original) A dishwasher door assembly in accordance with Claim 14 wherein said outer surface of said outer door panel is bowed.

16. (original) A dishwasher door assembly in accordance with Claim 14 wherein said recessed control surface comprises an escutcheon received in said outer surface.

17. (currently amended) A dishwasher door assembly comprising:

an outer door panel comprising a longitudinal axis, a bowed outer surface and a recessed control surface shielded by said outer surface, said recessed control surface disposed at an angle with respect to said longitudinal axis; and

a unitary inner door panel attached to said outer door panel.

18. (original) A dishwasher door assembly in accordance with Claim 17 wherein said outer door panel is unitary.

19. (original) A dishwasher door assembly in accordance with Claim 17 wherein said outer door assembly comprises an escutcheon.

20. (original) A dishwasher door assembly in accordance with Claim 17 wherein said outer surface is fabricated from metal.

21. (previously presented) A dishwasher door assembly in accordance with Claim 19 wherein said escutcheon is fabricated from plastic.
